

附属図書館

University Library

附属図書館はコンピュータ化により、サービスの向上、業務の効率化を図っている。国立情報学研究所と接続し、情報検索、目録・所在情報、図書館間相互貸借業務等、また、学内システムとして、貸出・返却処理、目録の作成・検索、雑誌受付等をコンピュータにより行っている。

蔵書の中には①チェンバレン・杉浦文庫②万葉文庫③近代詩歌文庫④教科書⑤明倫堂漢籍・国書⑥郷土資料等の貴重な文庫があり、学内外の研究者の利用に供している。

The University Library has been computerizing its operating systems to increase efficiency and to provide quality service programs. Terminals which are linked to the National Institute of Informatics are now available for obtaining nationwide information about academic publication and library catalogs. Also available are terminals connected to the mainframe computers of other libraries which can be used for specific book searches and for making loans to and from another library. Checking out and returning of books, preparation of catalogs, searching for books and reception of journals within the library are all controlled by computerized information processing system.

The library's growing collection includes valuable special collections such as (i) B.H. Chamberlain and T. Sugiura Collection, (ii) Manyo Library, (iii) Modern Poetry Library, (iv) Textbook Library, (v) Meirin-do Classic Library of Chinese and Japanese Books, and (vi) Library of the Local History. They serve the research needs of faculty and students as well as of scholars from outside the campus.
